

What is Computer Vision?

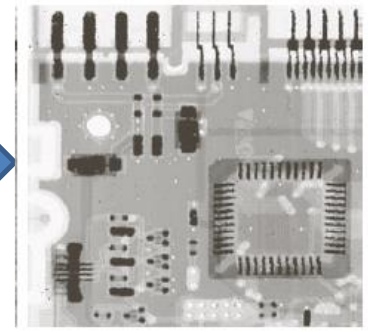

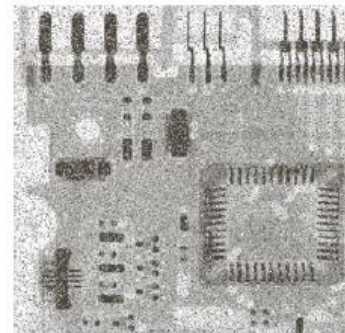

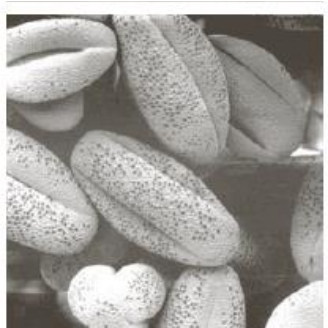

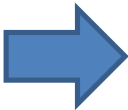

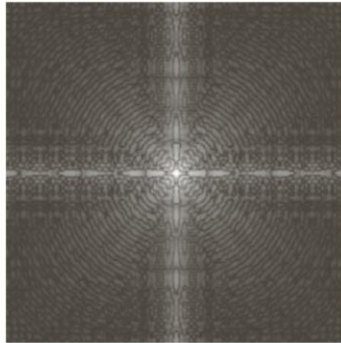

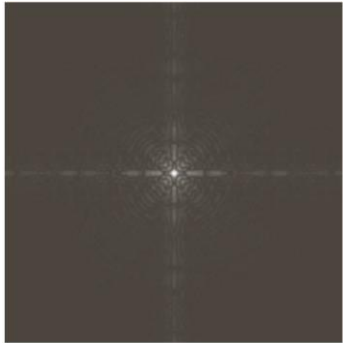

Sung Soo Hwang

- What is computer vision?
 - It is a research field that deals with how computers can understand digital images or videos
 - It seeks to automate tasks that the human vision system can do

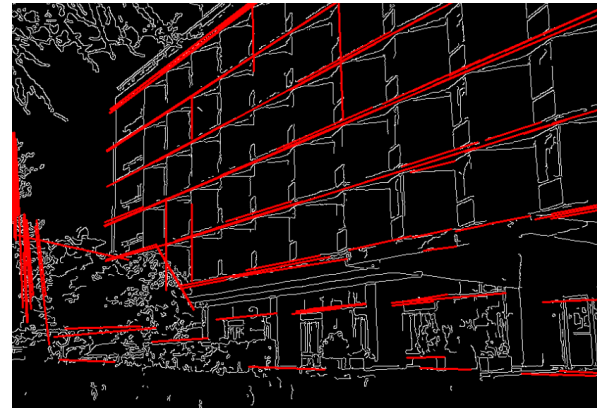

Introduction

- In computer vision, we have..
 - preprocessing

Introduction

- In computer vision, we have...
 - Edge extraction/Line detection

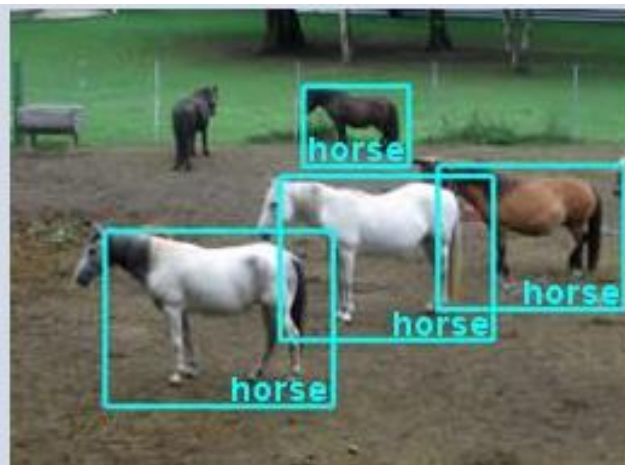

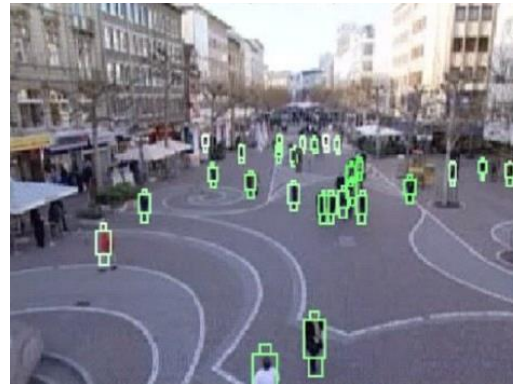

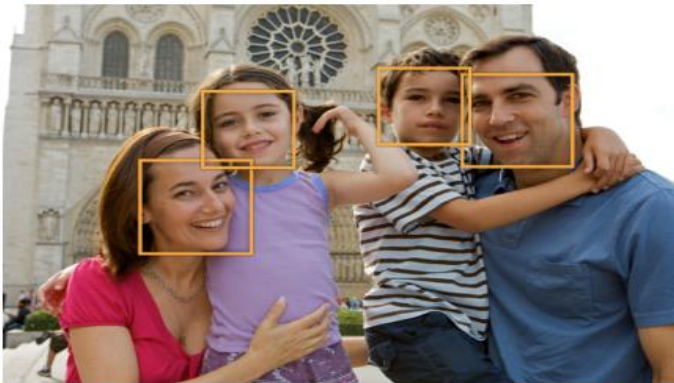

Introduction

- In computer vision, we have....
 - Image/Video segmentation

Introduction

- In computer vision, we have...
 - Object Detection/Tracking

Introduction

- In computer vision, we have...
 - Image Transformation
