Assignment 8

- Example

Exercise 10

Sung Soo Hwang

Exercise 10

- Explain how you can generate a panoramic image from these images step by step.

Exercise 10

- Explain how you can transform the left image to the right image using perspective transform. If you cannot, explain why.

Exercise 10

- Explain how to obtain the right image from the left image without having 4 corresponding pairs. Assume that we know the lines in blue on the left are actually parallel.
